CGPA

- 10

PROJECTS

Smart Gardening (08/2018 - 11/2018)

- Smart Gardening was a project about plant environmental monitoring systems. It monitors the soil moisture, air temperature, and air humidity of your plant(s) and automatically waters the plant based on the data received by sensors. Thing-speak and Blynk application is used to view those sensor data from a remote location.

Data Transmission Between Two Lora (07/2019 - 09/2021)

- This project was about transmitting data between two Lora by using blynk application and two Atmega328 also two Nuttify device outcome of this project is wireless data transmission.

Smart Medical Box (02/2021 - 06/2021)

- IoT in the field of medicine is aiming to keep people safe and connected with experts 24/7. A smart medicine box to remind, monitor and analysis the pill usage of the patient. In today's world, there are more chances for a person to forget about the medications they need to take due to a busy lifestyle. so we came up with this Smart IoT based medical box

SUMMER TRAINING

Internet of Things

Lovely Professional University, Punjab

06/2019 - 08/2019

Punjab

Achievements/Tasks

- Home Automation System uses the technology of Internet of Things for monitoring and controlling of the electrical and electronic appliances at home from any remote location by simply using a Smartphone. Implementation of a low cost, flexible home automation system is presented.
